Roderic H. Fabian, M.D.

- **Associate Professor of Neurology**

Clinical Service Area

Neurology

Medical School

M.D., University of Texas, Medical Branch at Galveston, Texas

Contact Information

Roderic H. Fabian, M.D.
Department of Neurology
Baylor College of Medicine
One Baylor Plaza, MS NB302
Houston, Texas 77030

Tel: 713-794-7393

Email: rfabian@bcm.edu

Journal Publications

1. Marcano DC, Bitner BR, Berlin JM, Jarjour J, Lee JM, Jacob A, et al. Design of poly(ethylene glycol)-functionalized hydrophilic carbon clusters for targeted therapy of cerebrovascular dysfunction in mild traumatic brain injury. J Neurotrauma. 2013;30(9):789-96. [View journal article]
2. Bitner BR, Marcano DC, Berlin JM, Fabian RH, Cherian L, Culver JC, et al. Antioxidant carbon particles improve cerebrovascular dysfunction following traumatic brain injury. ACS Nano. 2012;6(9):8007-14. [View journal article]
3. Mandava P, Dalmeida W, Anderson JA, Thiagarajan P, Fabian RH, Weir RU, et al. A pilot trial of low-dose intravenous abciximab and unfractionated heparin for acute ischemic stroke: Translating GP IIb/IIIa receptor inhibition to clinical practice. Transl Stroke Res. 2010;1(3):170-7. [View journal article]
4. Fabian RH, Perez-Polo JR, Kent TA. Perivascular nitric oxide and superoxide in neonatal cerebral hypoxia-ischemia. Am J Physiol Heart Circ Physiol. 2008;295(4):H1809-14. [View journal article]
5. Fabian RH, Perez-Polo JR, Kent TA. A decoy oligonucleotide inhibiting nuclear factor-kappaB binding to the IgGkappaB consensus site reduces cerebral injury and apoptosis in neonatal hypoxic-ischemic encephalopathy. J Neurosci Res. 2007;85(7):1420-6. [View journal article]
6. Gelman BB, Soukup VM, Holzer CE, 3rd, Fabian RH, Schuenke KW, et al. Potential role for white matter lysosome expansion in HIV-associated dementia. J Acquir Immune Defic Syndr. 2005;39(4):422-5. [View journal article]
7. Fabian RH, Perez-Polo JR, Kent TA. Extracellular superoxide concentration increases following cerebral hypoxia but does not affect cerebral blood flow. Int J Dev Neurosci. 2004;22(4):225-30. [View journal article]
