12:00 noon

Blue Bird Auditorium, NB-137, Neurosensory Center

Diagnostic Features of Spinal Radiculopathies

James M Killian, MD
Professor
Department of Neurology
Baylor College of Medicine

Objectives:

At the end of this presentation, participants should be able to:

- identify specific clinical features of spinal radiculopathies;
- differentiate spinal radiculopathies from related peripheral nerve lesions;
- understand the role EMG and NCV in the differential diagnosis

References:

- Preston, DC and Shapiro, BE. Electromyography and Neuromuscular disorders, Part 4, 2nd ed. Elsevier, 2005.

Target Audience, Needs, Educational Methods, Activity Evaluation:

Physicians, residents, fellows, and other healthcare professionals need to be updated about new advances in the clinical and research areas for the diagnosis, treatment, and management of patients with neurological disorders. Educational methods will include lectures, case presentations, audio/video presentations, and questions & answer sessions. Participants will be asked to complete an activity evaluation.

Accreditation/Credit Designation

Baylor College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. Physicians should only claim credit commensurate with the extent of their participation in the activity.
