

Monday, November 9, 2009

12:00 noon

Blue Bird Auditorium, NB-137, Neurosensory Center

Treatment of Hyperkinetic Movement Disorders

Joseph Jankovic, M.D.

Professor of Neurology

Distinguished Chair in Movement Disorders

Director, Parkinson's Disease Center and

Movement Disorders Clinic

Baylor College of Medicine-Department of Neurology

Objectives – At the end of this lecture, participants should be able to:

- Recognize the phenomenology of the most common hyperkinetic movement disorders
- Be familiar with the various treatment options for patients with hyperkinetic movement disorders
- Be aware of the advantages and disadvantages of the available treatments

Target Audience, Needs, Educational Methods, Activity Evaluation:

Physicians, residents, fellows, and other healthcare professionals need to be updated about new advances in the clinical and research areas for the diagnosis, treatment, and management of patients with neurological disorders. Educational methods will include lectures, case presentations, audio/video presentations, and questions & answer sessions. Participants will be asked to complete an activity evaluation.

Accreditation/Credit Designation

Baylor College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. Physicians should only claim credit commensurate with the extent of their participation in the activity.
