PARKINSON'S DISEASE CENTER AND MOVEMENT DISORDERS CLINIC

The Parkinson's Disease Center and Movement Disorders Clinic (PDCMDC) at Baylor College of Medicine has long been recognized as one of the world's leading clinical and research institutions focused on Parkinson's disease and other movement disorders. Founded by Joseph Jankovic, MD in 1977, the PDCMDC provides an unparalleled setting for treatment, research and education, with the ultimate goal of finding a cause and a cure for neurodegenerative and movement disorders. Dr. Jankovic, Professor of Neurology and PDCMDC director, is the past president of the Movement Disorders Society and the recipient of the 2007 American Academy of Neurology Movement Disorders Research Award, sponsored by the Parkinson's Disease Foundation. He has authored over 700 articles and chapters, and has published over 35 books. The other members of the PDCMDC include William Ondo, MD, Associate Professor of Neurology and Associate Director of the PDCMDC, and Joohi Jimenez-Shahed, MD, Assistant Professor of Neurology. Our highly regarded Movement Disorders Fellowship Program has trained numerous physicians and researchers, many of whom have become internationally recognized leaders in the field of movement disorders. The Clinic's 10,000 patient visits per year and a database of more than 25,000 individual patients and videos provide a powerful resource for effective recruitment into clinical trials and other research studies. The National Parkinson Foundation (NPF) recognized the accomplishments of the PDCMDC by selecting it as one of its first Centers of Excellence and by supporting the Center since 1992. In 2001, the Huntington's Disease Society of America (HDSA) also awarded the PDCMDC the status of a Center of Excellence.

MISSION STATEMENT

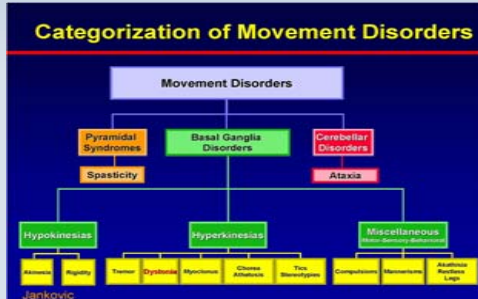

The primary mission of the Parkinson's Disease Center and Movement Disorders Clinic (PDCMDC) is:

- To provide the most professional and compassionate patient care available;
- To initiate and conduct clinical and basic research which upholds the highest scientific standards; and
- To train physicians and other health care professionals to become skilled in the recognition and treatment of Parkinson's and other movement disorders and to inspire them to pursue basic or clinical research in the area of movement and neurodegenerative disorders.

Restless Leg Syndrome	647	2.6
Others	1,529	6.1
TOTAL	25,053	100.0

Among several recently published books by Dr. Jankovic is the widely-used 5th edition of *Parkinson's Disease and Movement Disorders*, which includes a CD "Video Atlas of Movement Disorders" and

Principles and Practice of Movement Disorders, written by Drs. Fahn and Jankovic, based on the annual (since 1990) Movement Disorders course in Aspen, Colorado. The book also includes DVD of movement disorders.

COMMUNITY OUTREACH

Members of the PDCMDC have donated their time and expertise in a number of community events designed to increase public awareness about movement disorders. In addition to the annual Huntington's Disease Society of America (HDSA) run/walk, members of the PDCMDC have participated in the Tourette Camp sponsored by the Texas Chapter of the Tourette Syndrome Association (TSA), in the Sol & Miriam Rogers Golf Tournament held annually in Beaumont, and in the ¡Vive Tu Vida! Community Health Fair sponsored by the Houston Hispanic Health Coalition, part of our outreach activities for the National Parkinson Foundation (NPF) Center of Excellence.

Faculty and staff from the PDCMDC came out to support the 6th Annual HDSA Houston Area Run/Walk "Walking for a Cure - Team Hope", for the Huntington Disease Society of America, Texas Affiliate

BASIC RESEARCH

Parkinson's Disease Research Lab personnel

The PDCMDC is also world-renowned for its basic science research, conducted at the Parkinson's Disease Research Laboratory (PDRL), located at the Department of Neurology, Neurosensory Center. The highly skilled and dedicated researchers at PDCMDC and PDRL are currently conducting over 75 research studies, approved by Baylor's Institutional Review Board for Human Research.

BAYLOR COLLEGE OF MEDICINE

Baylor College of Medicine in Houston, the only private medical school in the Greater Southwest, was founded in 1900 and is an internationally respected medical and research institution known for excellence in education, research and patient care. The college consistently ranks among the top of the country's medical schools. In 2007, the U.S. News & World Report again has ranked the college 10th overall among the nation's top medical schools for research and 11th for primary care. BCM also is listed 13th among all U.S. medical schools for National Institutes of Health funding, and No. 1 for research expenditures in biological science by the National Science Foundation.

TEXAS MEDICAL CENTER

Located in the hub of the Texas Medical Center, the world's largest medical complex, the PDCMDC, on the 18th Floor of the Smith Tower, includes academic, clinical, laboratory, and administrative facilities, as well as the Experimental Therapeutics Center (ETC), which provides a setting for clinical research into novel medical and surgical therapeutic interventions.
