

Monday, April 29, 2013

Noon – 1:00 PM

Neurosensory Center, Blue Bird Auditorium, NB-137

“A Pooled Analysis Identifies The Promise and Limitations To Improve Upon Intravenous rt-PA”

Pitchaiah Mandava, M.D.

Associate Professor, Department of Neurology
Baylor College of Medicine

Objectives – At the conclusion of the session, the participants should be able to:

- Understand techniques to model outcomes in trials.
- Understand methods to predict success or failure of early phase trials
- Understand reasons why some trials have failed.

Target Audience, Needs, Educational Methods, Activity Evaluation: Physicians, residents, fellows, and other healthcare professionals need to be updated about new advances in the clinical and research areas for the diagnosis, treatment, and management of patients with neurological disorders. Educational methods will include lectures, case presentations, audio/video presentations, and questions & answer sessions. Participants will be asked to complete an activity evaluation.
