Frontotemporal dementia: genetic and medical associations

Ryan McDonald, MD
Neurology Residency Program
(Mentor: Paul Schulz, MD)

Objectives:
At the end of this presentation, participants should be able to:
- List the known genotypes and phenotypes associated with frontotemporal dementia (FTD),
- Appreciate common medical conditions that occur with FTD more than non-FTD dementias,
- Understand potential areas of research needed in FTD.

Target Audience, Needs, Educational Methods, Activity Evaluation:
Physicians, residents, fellows, and other healthcare professionals need to be updated about new advances in the clinical and research areas for the diagnosis, treatment, and management of patients with neurological disorders. Educational methods will include lectures, case presentations, audio/video presentations, and questions & answer sessions. Participants will be asked to complete an activity evaluation.

Accreditation/Credit Designation
Baylor College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. Physicians should only claim credit commensurate with the extent of their participation in the activity.
