Perspectives on deep brain stimulation in treatment of Parkinson’s disease

Eugene C. Lai, MD, PhD
Professor, Department of Neurology
Baylor College of Medicine
Director, Parkinson’s Disease Research, Education and Clinical Center
Michael E. DeBakey VA Medical Center

Youssef G. Comair, MD, FRCSC
Professor and Vice Chairman
Department of Neurosurgery
Baylor College of Medicine

Objectives: At the end of this presentation, participants should be able to:

- Understand the surgical treatment options for Parkinson’s disease
- Discuss the results of a multi-site randomized trial comparing best medical therapy versus deep brain stimulation for Parkinson’s disease
- Recognize the adverse events following best medical therapy or deep brain stimulation for Parkinson’s disease

Target Audience, Needs, Educational Methods, Activity Evaluation:
Physicians, residents, fellows, and other healthcare professionals need to be updated about new advances in the clinical and research areas for the diagnosis, treatment, and management of patients with neurological disorders. Educational methods will include lectures, case presentations, audio/video presentations, and questions & answer sessions. Participants will be asked to complete an activity evaluation.

Accreditation/Credit Designation
Baylor College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. Physicians should only claim credit commensurate with the extent of their participation in the activity.
