Neurology Grand Rounds
Sponsored by Baylor College of Medicine

Monday, August 11, 2008
12:00 noon
Blue Bird Auditorium, NB-137, Neurosensory Center

Genetics of Dementia

Kinga Szigeti, MD, PhD
Assistant Professor of Neurology
Baylor College of Medicine

Objectives:
At the end of this presentation, participants should be able to:

• discuss genotype-phenotype correlation in dementia
• discuss mutational mechanisms inferring risk of dementia
• interpret results of genome-wide association studies
• discuss utility of genetic knowledge in clinical practice

References:

Target Audience, Needs, Educational Methods, Activity Evaluation:
Physicians, residents, fellows, and other healthcare professionals need to be updated about new advances in the clinical and research areas for the diagnosis, treatment, and management of patients with neurological disorders. Educational methods will include lectures, case presentations, audio/video presentations, and questions & answer sessions. Participants will be asked to complete an activity evaluation.

Accreditation/Credit Designation
Baylor College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. Physicians should only claim credit commensurate with the extent of their participation in the activity.
