Aphasia and Its Recovery Following Stroke

Thomas A Kent, M.D.
Professor of Neurology, Baylor College of Medicine and Chief of Neurology, Michael E. DeBakey VA Medical Center

Objectives:

At the end of this presentation, participants should be able to:
- Distinguish the most common forms of aphasia following stroke
- Understand the effect and limitations of speech therapy following stroke
- Learn about the use of functional imaging methods to map functional activity following stroke

Target Audience, Needs, Educational Methods, Activity Evaluation:
Physicians, residents, fellows, and other healthcare professionals need to be updated about new advances in the clinical and research areas for the diagnosis, treatment, and management of patients with neurological disorders. Educational methods will include lectures, case presentations, audio/video presentations, and questions & answer sessions. Participants will be asked to complete an activity evaluation.

Accreditation/Credit Designation
Baylor College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. Physicians should only claim credit commensurate with the extent of their participation in the activity.
