Deep Brain Stimulation or Drug Infusion in Advanced Parkinson’s Disease?

Alberto Albanese, MD
Professor of Neurology
National Neurological Institute “Carlo Besta”
Milan, Italy

Objectives:
At the end of this presentation, participants should be able to:

- Identify which PD patients can best benefit from DBS or drug infusion
- Be aware of therapeutic effects and safety profiles of these treatments
- Better understand the relationship between STN stimulation and dopaminergic treatment

Target Audience, Needs, Educational Methods, Activity Evaluation:
Physicians, residents, fellows, and other healthcare professionals need to be updated about new advances in the clinical and research areas for the diagnosis, treatment, and management of patients with neurological disorders. Educational methods will include lectures, case presentations, audio/video presentations, and questions & answer sessions. Participants will be asked to complete an activity evaluation.

Accreditation/Credit Designation
Baylor College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. Physicians should only claim credit commensurate with the extent of their participation in the activity.
