Clinical Microdialysis: Neurochemical Window into the Brain

J. Clay Goodman, M.D. FAAN
Associate Dean for Medical Education
Walter Henrick Moursund Endowed Chair in Pathology
Professor of Pathology (Neuropathology) and Neurology
Neuropathology Program Director
Department of Pathology
Baylor College of Medicine

Objectives:
At the end of this presentation, participants should be able to:

- Understand the principles, benefits, limitations and risks of cerebral microdialysis in clinical settings.
- Understand how neurochemical monitoring using microdialysis can influence clinical management in the critical care unit.
- Understand how neurochemical monitoring can advance understanding of neurological disease processes.

Target Audience, Needs, Educational Methods, Activity Evaluation:

Physicians, residents, fellows, and other healthcare professionals need to be updated about new advances in the clinical and research areas for the diagnosis, treatment, and management of patients with neurological disorders. Educational methods will include lectures, case presentations, audio/video presentations, and questions & answer sessions. Participants will be asked to complete an activity evaluation.

Accreditation/Credit Designation
Baylor College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. Physicians should only claim credit commensurate with the extent of their participation in the activity.
