Axonal ion channels and epilepsy: from new genes to new therapies

Edward Cooper, MD
Assistant Professor of Neurology
University of Pennsylvania

Objectives:
At the end of this presentation, participants should be able to:
• Review ion channel mechanism underlying excitability and epilepsy;
• Understand clinical phenotypes of inherited potassium channel disorders;
• Learn the most recent strategies in channel-specific therapy of neonatal epilepsies

References:

Target Audience, Needs, Educational Methods, Activity Evaluation:
Physicians, residents, fellows, and other healthcare professionals need to be updated about new advances in the clinical and research areas for the diagnosis, treatment, and management of patients with neurological disorders. Educational methods will include lectures, case presentations, audio/video presentations, and questions & answer sessions. Participants will be asked to complete an activity evaluation.

Accreditation/Credit Designation
Baylor College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. Physicians should only claim credit commensurate with the extent of their participation in the activity.
