Dermatomyositis: Case Studies in Adults

Robert J. Kolimas, M.D.
Assistant Professor of Neurology
Baylor College of Medicine

Objectives – At the end of this lecture, participants should be able to:

- Recognize the clinical and muscle pathologic features of dermatomyositis including the spectrum of findings.
- Understand the immunopathogenesis of dermatomyositis.
- Identify the first and second line treatment options as well as in refractory cases.

Target Audience, Needs, Educational Methods, Activity Evaluation:
Physicians, residents, fellows, and other healthcare professionals need to be updated about new advances in the clinical and research areas for the diagnosis, treatment, and management of patients with neurological disorders. Educational methods will include lectures, case presentations, audio/video presentations, and questions & answer sessions. Participants will be asked to complete an activity evaluation.

Accreditation/Credit Designation
Baylor College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. Physicians should only claim credit commensurate with the extent of their participation in the activity.
