Recognition and Management of Non-Convulsive Status Epilepticus in the Critically ill

David K. Chen, M.D.
Assistant Professor
Department of Neurology
Baylor College of Medicine

Objectives – At the end of this lecture, participants should be able to:

- Non-convulsive status epilepticus (NCSE) is generally under-recognized;
- EEG diagnosis of NCSE can be difficult as the diagnosis may not be dichotomous (yes or no), but along a continuum of increasing probability; and
- Therapeutic approach should be tailored to individual cases, rather than set by stringent protocols.

Target Audience, Needs, Educational Methods, Activity Evaluation:

Physicians, residents, fellows, and other healthcare professionals need to be updated about new advances in the clinical and research areas for the diagnosis, treatment, and management of patients with neurological disorders. Educational methods will include lectures, case presentations, audio/video presentations, and questions & answer sessions. Participants will be asked to complete an activity evaluation.

Accreditation/Credit Designation

Baylor College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. Physicians should only claim credit commensurate with the extent of their participation in the activity.
