“Predicting Progression in AD”

Rachelle S. Doody, M.D., Ph.D.
Effie Marie Cain Chair in Alzheimer’s Disease Research
Director, Alzheimer’s Disease and Memory Disorders Chair
Professor
Department of Neurology
Baylor College of Medicine

Objectives – At the end of this lecture, participants should be able to:

• Understand the evidence that patients with AD progress at different rates
• Be able to estimate rates of initial progression for patients with AD
• Understand the importance of predicting progression rates for clinical care and for design of disease-modifying clinical trials

Target Audience, Needs, Educational Methods, Activity Evaluation:

Physicians, residents, fellows, and other healthcare professionals need to be updated about new advances in the clinical and research areas for the diagnosis, treatment, and management of patients with neurological disorders. Educational methods will include lectures, case presentations, audio/video presentations, and questions & answer sessions. Participants will be asked to complete an activity evaluation.

Accreditation/Credit Designation
Baylor College of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. Physicians should only claim credit commensurate with the extent of their participation in the activity.
