

**November 2008**

**Vol. 13 No. 11**

RSV season is here !!! RSV was the most common virus isolated and detected by rapid testing. Rhinovirus, enterovirus and adenovirus were also common, and small numbers of parainfluenza virus types 1 and 2 were also isolated. Three positive rapid flu A tests were reported, but none of them were confirmed by viral culture. Stay tuned to the RSV-FLU-O-METER [http://www.bcm.edu/web/pediatrics/documents/RSV-FLU-O-METER\\_08-09\(combined\).pdf](http://www.bcm.edu/web/pediatrics/documents/RSV-FLU-O-METER_08-09(combined).pdf) and Check out "What's going 'round now!" links for further updates.
