

# Aortic Valve Operative Outcomes in Marfan Patients Study (AVOMP)

## ANNOUNCEMENT 17

March 30, 2016

Updates: November 17, 2017; May 24, 2018

---

### Extended Study Follow-up

### Shipping and Handling of Images

#### **Imaging Core**

The [Imaging Core](#) at Mayo Clinic, Rochester, USA accepts and analyzes digital images including echocardiograms, CTs and MRIs.

#### **Image Modality**

Required modality: Echocardiogram

In absence of echocardiogram, CT and MRI will be accepted.

#### **Acquisition**

Images can be acquired at the study sites and/or at the outside institutions.

#### **Media**

CD

Videotapes are not accepted.

#### **Preferred Data Format**

DICOM

If this format is unavailable, the images still need to be obtained and sent to the Imaging Core.

#### **Deidentification**

No deidentification is necessary if the subject has agreed to provide non-deidentified images by checking "Yes" in question 10 of the Informed Consent Form (ICF). Upon completion of re-consenting, subjects' ICF responses will be provided to the study sites and posted on the [web site](#).

#### **Image Reports**

Image reports will be requested at all times for scheduled follow-up periods, even if digital images are not available.

US study sites will fax or securely e-mail the image reports to Dr. Volguina, fax 832-355-9944, [volguina@bcm.edu](mailto:volguina@bcm.edu). International sites will keep reports with subjects' records until data are requested.

#### **Image Transfer Form**

Image Transfer Form is completed for each scheduled image, whether sent or not sent to the Imaging Core. When sending an image, submit the Form to the online [Velos database](#) around the time of shipping.

#### **Labeling Digital Images**

Site coordinator will label image CD with a marker to include the following information:

- Patient ID
- Image modality
- Date of image
- Closest follow-up period

#### **Shipping Digital Images**

- Request the prepaid shipping label from Denice Corbin [Corbin.Denice@mayo.edu](mailto:Corbin.Denice@mayo.edu) of the Imaging Core.
- Label image CD(s).
- For each image, complete section A of the Image Transfer Form in online [Velos database](#).
- Mail all labelled CDs to the Imaging Core in one shipment using the obtained shipping label.
