RE: Discontinuation Memorandum

Effective April 21, 2014, the Medical Genetics Laboratories at Baylor College of Medicine will discontinue Test Codes:

- **3105 - Complex IV (COX) Deficiency Panel - Nuclear Genes**
- **3335 - mtDNA Depletion Panel, Hepatocerebral Form**
- **3080 - Mitochondrial DNA Depletion Syndrome Panel**
- **3620 - Nuclear Encoded Complex I Deficiency Panel**

The above tests will be replaced by the following comprehensive Next Generation Sequencing based tests:

- **2170 - Mitochondrial Respiratory Chain Complex IV Deficiency Panel by Massively Parallel Sequencing (BCM-MitomeNGSSM)**
- **2130 - mtDNA Depletion/Integrity Panel by Massively Parallel Sequencing (BCM-MitomeNGSSM)**
- **2155 - Mitochondrial Respiratory Chain Complex I Deficiency Panel by Massively Parallel Sequencing (BCM-MitomeNGSSM)**

Please direct any billing questions to 713-798-3566 or email us at medgenbilling@bcm.edu. Please visit our website for any additional notices or postings.

Thank you for your valued business. We look forward to providing you with the highest quality genetic testing services.

Sincerely,

Sean Y. Kim
General Manager
Medical Genetics Laboratories
