ARTS IN AGING CALENDAR Huffington Center on Aging

We salute the “Arts in Aging” as a complement to a good life long lived. In this 24th Edition, we again feature the works of current artists ranging from septuagenarians to nonagenarians. The scenes and people they painted depict life in the Americas, Europe, the Far East, and the Australian continent; the eclectic look of the calendar is indicative of the wonderful differences in people worldwide. Goethe correctly said that “*Science and Art belong to the whole World and the barriers of nationality vanish before them.*” Born in the first half of the last century, these artists remind us daily that older people make important contributions to the quality of our lives. Their creativity is timeless, and the beauty their eyes saw we see in these wonderful works.
