NOTE FROM THE CHAIR

Each department employee deserves kudos for the way you have pulled together (while maintaining social distancing) in the face of the COVID-19 pandemic. As our medical professionals serve at various clinics and hospitals and put their lives on the line to ease the suffering of others, I want to commend our department employees for your stamina, tenacity, and resilience. You maintain the daily routine, which allows our department to function at maximum capacity. We could not continue as we have without your hard work and diligence. Your firm resolve and effort for the common good cannot be overstated. I am proud to work with you.

While providing care during an epidemic is not an easy task and has its risks, our providers and staff have excelled in patient care in clinics and hospitals, caring for COVID and non-COVID patients. We all know that other illnesses do not stop occurring during the pandemic, and our clinics and community health centers continue to be active and available for care. Both our Community Health Program health centers and clinics and Baylor Family Medicine report that patient telehealth visits account for roughly half of all patient visits. While CHP clinics do not test for the virus, during the first half of the year BFM tested 1,273 patients, with a positivity rate of 20.6%. We are grateful that the percentage has decreased since then due to mask-wearing, social distancing, and other measures instituted to slow the disease’s progression. Please see our COVID-19 pages for more information and relevant links.

While clinical care is the most apparent aspect of what we have done recently, our student and residency education have faced enormous challenges due to the pandemic. Thanks to Drs. Huang and Warwick for their continued work to provide sites for education and to modify training activity to accommodate our students and resident trainees. Not an easy task.

COVID-19 is not the only problem that calls for our attention and action. Severe racial disparities persist in many facets of life – including health. Recently our faculty, students, and trainees joined forces for White Coats for Black Lives, a Houston-wide medical school demonstration in memory of George Floyd at the Reflection Pool at Hermann Park. Read the article White Coats for Black Lives in BCM Family, and the essay by Sandra Gonzalez, Ph.D., LCSW, on health equity and implicit bias on page 4.

Amid all the headlines and uncertainty, it is easy to overlook the important milestones that Baylor College of Medicine and the department have achieved. The U.S. News & World Report has published the annual list of top medical schools (research) in the nation, with Baylor College of Medicine coming in at 22nd, and in the Primary Care category, we retained our #4 ranking. Under Family Medicine, we upped our position to 15th in the nation. I want to commend the faculty and staff for this great achievement.
COVID-19 fills the airwaves and social media as new cases rise in Houston. As we battle on the front lines of this pandemic and listen with heightened attention to patients’ symptoms, we hope you can sense the gratitude of your patients and your colleagues.

Baylor College of Medicine has implemented the Baylor Incident Command Center, which sends out the latest information on what Baylor employees need to know concerning the pandemic. Coronavirus Preparedness website and find additional resources highlighted below.

The outbreak may take a toll on our well-being, including anxiety about our health and that of our loved ones, and challenges presented by social distancing and self-quarantining. Several strategies can help maintain well-being and promote resilience during the pandemic. Please refer to the mental health resources on the Coronavirus Mental Health Resources website. Baylor has also partnered with MedEd Solutions to offer the Well-Being Index (WBI), a confidential online assessment that provides immediate feedback and support tools.

For childcare resources, the Mayor’s Office partnered with the Houston Endowment and the Harris County Judge’s office to develop a child care solution during the pandemic. Essential workers in various counties can register for child care and financial support online at FindChildCareNow.org. Read more.

Relief options are available for employees to take a loan or a hardship withdrawal on their vested retirement funds through December 31, 2020. Read more information on Retirement Plan CARES Relief.

LegalEASE is offering its Emergency Financial Hardship Package of legal services to all Baylor employees and students at no cost through 2020.

Coronavirus Research: Baylor’s infectious diseases team continues to compile weekly newsletter updates of the latest published and pre-print research on COVID-19 worldwide. Each newsletter also includes the latest stats on cases locally and in Texas.

For Supervisors

2. Alert the section/department personnel about the positive case (without using names).

3. Thoroughly clean office space utilizing BCM guidelines when an employee has tested positive.

Jonnae Atkinson, M.D., worked to address the impact of COVID-19 on the African American community with Mary Susan Moore Medical Society, which partnered with Chevron and Baker Ripley to create “stay well kits” distributed in the Greater Houston area.

As a reminder...

**If you experience symptoms**

1. Call OHP at 713-798-7880 and do not come into work. Based upon your symptoms, OHP may request that you be tested at the BCM Testing Site.

2. Call your supervisor or program director and discuss your status. If you work at an affiliate, also contact your onsite supervisor and follow affiliate guidelines.

3. If you feel you need medical attention, contact your PCP. The PCP will assess your symptoms and determine if you should be tested.

Occupational Health Guidelines: Returning to Work BCM Continue to Work/Return to Work Guidelines Bright Horizons Back-Up Care Important HR Announcements and Resources
Training was held for the Baylor Family Medicine in March during the weekly staff meeting at the Kirby clinic. After watching a training video, clinic personnel donned PAPR and Protective Equipment, which is used each time a patient is tested. Masks and face shields are used when interviewing all patients in clinic.

Photos from the Baylor Family Medicine training. (Clockwise) Aymer Al-Mutairi, M.D.; Mohamad Sidani, M.D., MS; Sarah Bindner, PA-C; and Michelle Vasquez, MA.

**If you test positive for coronavirus**

1. Contact your supervisor and OHP
3. Follow BCM [OHP Guidelines](https://www.baylorcollegeofmedicine.com/about/usnews/COVID-19) for return to work.
4. Expect a call from the Contact Tracing team.
5. After recovery, consider participating in COVID research studies.

Recognizing Implicit Bias

- Sandra J. Gonzalez, Ph.D., LCSW
Assistant Professor

On June 2, an estimated 60,000 people converged on downtown Houston for a peaceful protest to honor the life of George Floyd, the Black man whose life came to an end while in police custody on May 25. On the same day, students, trainees, faculty and staff from the Texas Medical Center gathered to stand in solidarity in an event called White Coats for Black Lives. Unfortunately, the death of George Floyd is only one in a series of tragic incidents that have claimed the lives of so many Black, Indigenous, and People of Color (BIPOC).

What we often fail to appreciate – in part because of our own discomfort – is that these events do not occur in a vacuum and are undoubtedly the result of decades-long systemic racism and discrimination.

Several years ago I presented a workshop on culturally-relevant practice to a large group of healthcare social workers in Memphis, TN, a city historically marred by racial tensions. The most striking part of this experience was the incredulity expressed by not one, not two, but several members of the audience who could not believe that I would make negative assumptions about their feelings toward BIPOC communities, much less that I would suggest that their unconscious beliefs and attitudes might perpetuate health care disparities. It was uncomfortable but necessary to have this conversation. We had uncovered implicit bias.

Implicit bias refers to unconsciously held biases toward marginalized groups, including women, BIPOC, and LGBTQ+. The beliefs are so ingrained and inaccessible that they go unrecognized. I would argue that most of us would not consider ourselves to behave in an explicitly biased manner when delivering patient care. However, a 2015 systematic review found low to moderate levels of implicit bias among healthcare professionals, regardless of level of training. The researchers also found a significant relationship between implicit bias and patient-provider interactions, treatment decisions, treatment adherence, and patient health outcomes. So, what can we do? Current evidence has demonstrated that implicit bias training does not produce long term behavioral change. Nevertheless, other studies have shown that stereotypes can be unlearned and that there are policies and protocols that can be put into place to minimize the effect of implicit bias. As an individual, you can also make a difference. Simply put, listen and learn. When we engage in meaningful discourse and learn from those who may be different from us, we begin to chip away at those attitudes and beliefs and, ultimately, create a more equitable health care system.

If you are interested in writing an essay for this column, please submit your thoughts to Dr. Zoorob. He is interested in sharing what's on your mind.
Congratulations to Fareed Khan, MBBS, the 2019-2020 recipient of the Ben and Margaret Love Foundation Bobby Alford Award for Academic Clinical Professionalism, which honors professionalism and humanism, and the recipient’s ability to model these qualities in the practice of medicine.

Dr. Khan’s mantra has been to teach medical knowledge while emphasizing compassionate conversations, ethical and moral decisionmaking, professionalism, enhanced communication skills, problem solving, and critical thinking.

Dr. Khan has held varied teaching and mentoring roles that span his entire career at Baylor while serving as an attending physician at Northwest Community Health Center and Ben Taub General Hospital. In all settings, he practices evidence-based, patient-centered, compassionate care. Dr. Khan is known as an excellent family physician in the ambulatory and inpatient setting, and as an active teacher of medical students and residents. He has demonstrated leadership in several academic positions: Associate Director of the FCM Clerkship, Director of the FCM SubInternship elective, and Director of the Family Medicine Residency Program. Recently, Dr. Khan recently stepped down from his Associate Director position of the Family Residency Program, yet remains Core Faculty. He is currently Director of two elective courses: Care of the Underserved elective, and History of Medicine elective. He remains the Vice Chair for Community Health for FCM and the Assistant Chief of Staff of Ambulatory Care Services for Harris Health System, and has served as a Faculty Senator. His advocacy on behalf of underserved patients has taken him on over 30 trips to rural Honduras since 2001 and to China to promote primary care.

His themes, which he regularly communicates during “Khanversations,” as residents fondly call them, include the ideas that “compassion is a muscle that gets stronger with use” (Jonathan Safran Foer), and that this residency program is the “family of family medicine.” His openness and availability to learners have allowed him to have numerous impromptu mentorship and career guidance conversations. He continually advocates for his team, promoting them for awards, helping them with life decisions, and supporting them when they need testimonials. He has retained over a third of all residency graduates to follow his example and continue to work at Harris Health System in the indigent patient’s service. He has been a pillar of support and a mentor and advisor to all who seek his guidance.

This award is so richly deserved. We appreciate that Baylor recognizes his great value to our department and to the greater Houston community.

Established in 2013, the Faculty Awards for Excellence in Patient Care honor outstanding contributions by Baylor faculty. This year, Rashmi Rode, M.D., was awarded the Star Faculty Award for Excellence in Patient Care. Shruti Varadarajan, M.D., received the Early Career Faculty Award for Excellence in Patient Care.

Kudos to both winners!
Please extend a round of applause to our 2020 Women of Excellence award recipients, Joy Blumenreich, M.D., and Alicia Kowalchuk, D.O., Baylor’s Women of Excellence Award was established in 2018 to honor individuals who have demonstrated extraordinary dedication to issues that affect women at Baylor College of Medicine or in the broader community. The department is indeed fortunate to have such outstanding role models dedicated to raising awareness about diversity, inclusion, and equity issues affecting women.

Women of Excellence awards have previously been presented to department winners Malvika Juneja, M.D., Frené LaCour-Chestnut, M.D., Fabrizia Faustinella, M.D., PhD, Vida Kahrizi, MBA-HC (now a Senior Practice Manager in Medicine-Cardiology, and Andrea Link, M.D., (now with Andrea Link Consulting).

Fabrizia Faustinella, M.D., PhD, has been honored several honors this year. In February, she earned the top grade for the exceptional quality of her reviews in *Annals of Internal Medicine*.

In April, her film documentary on homelessness, *The Dark Side of the Moon*, received a Gold Remi Award in the Social/Economic Issues Category at the 53rd WorldFest International Film Festival.

After receiving the Norton Rose Fulbright Faculty Excellence Award for Development of Enduring Educational Materials in November 2019, Dr. Faustinella became a member of the BCM Academy of Distinguished Educators this year.
**Alicia Kowalchuk, D.O.**

Chair’s Recognition Award

*Presented to faculty who are recognized by the Chair for outstanding service, leadership of great caliber, and dedication to the Department of Family and Community Medicine.*

**Jonnae Atkinson, M.D., Malvika Juneja, M.D.**

Teaching and Education Awards

*Given to the faculty devoted to department learners, including students and residents as manifested by quantity and quality of teaching. Excellent evaluations of teaching, evidence of curriculum development, and leadership in education are additional criteria.*

**Susan Cochran, M.D., Crystal Nwagwu, M.D., MHA**

Clinical Service Awards

*Awarded to faculty demonstrating excellence in service, patient satisfaction, positive quality indicators, innovation in clinical care, and number of patients served.*

**Larissa Grigoryan, M.D., PhD**

Research & Scholarly Award

*Awarded to faculty who demonstrate excellence in quality and quantity of scholarly work, including publications and funding.*

**Hesham Mohamed, M.D.; Hammad Mahmood, M.D.; Aymer Al-Mutairi, M.D.; Eric Lee, M.D.**

**Service and Citizenship Awards**

*Service above the call of duty in all areas, especially COVID-related duties or service. Active service on department committees and assignments, demonstration of leadership in championing department and BCM mission.*
Kudos to our recent Champions of the Quarter, Joy Blumenreich, M.D. and Hesham Mohamed, M.D.

A sincere thank you to Kenneth Barning, M.D., who reached the term limit this election cycle. We all heartily agree with fellow Senator, Dr. Juneja, who writes, “You have created a pathway for the FCM department to be visibly present in the Senate through a robust representation and have elevated our concerns to many committees. You have been an inspiration for other senators, and we hope you continue to guide and assist the FCM senators for their future endeavors.”

Special commendation to Rashmi Rode, M.D., and Crystal Nwagwu, M.D., who join our other Faculty Senators, Jonnae Atkinson, M.D. (Senate Secretary); Irvin Sulapas, M.D.; Malvika Juneja, M.D.; Frené LaCour-Chestnut, M.D.; and Nihita Shah, M.D., who retains her position. Elections were held this spring.
The College recently announced the new Professional Educator Appreciation and Recognition (PEAR) awards, given by BCM students, to recognize mentors who have had a significant impact on students during their medical training. The department’s winners of this inaugural award are Eric Lee, M.D., and Elizabeth Tran, M.D. Below are quotes from students’ submissions.

"Dr. Lee is so conscientious of what we’re going through and eager to figure out how we learn best. Every time we go through a physical exam on a patient with him, he demonstrates it for us clearly, sends out follow-up information and asks for our feedback. He is a professor who always tries his best to make our learning experience excellent, and we so appreciate him."

"Dr. Tran displayed exceptional patient care during my first clinical experience as a medical student. She emphasized the transparency and trust involved in the relationship between patients and physicians. She knew details of the lives of each of her patients, taking into account how their unique situation impacted not only their health but also their access to healthcare. The final day of our preceptor sessions, she taught me skills I would learn in the future and gave me the opportunity to practice them together. She was always interested in my education and knew that as a first-semester first-year medical student, there was very little that I knew. Regardless of this, she treated me with the utmost respect and took these moments as opportunities to relate the basic sciences to the art of clinical practice. Constantly looking up new therapies and new standards of care, Dr. Tran proved that clinical knowledge is dynamic and there is great wisdom in being open to new ideas."

Congratulations to Jason Buchanan, M.D., MS, who recently completed his master’s degree in Biomedical Informatics (clinical concentration) with a 4.0 GPA. After completing the Epic Power User certification, Dr. Buchanan anticipates completing the Epic Physician Builder certification soon. He initiated an Epic optimization program, PrEOP (Provider Ehr Optimization Program), but his fellow Valbona Health Center providers know it as “Epic Tips and Tricks.”

In February, Arindam Sarkar, M.D. (PGY-3), Lucy, Luc, M.D. (PGY-2), and Elizabeth Thouakulathu, M.D. (PGY-1) were inducted into the Gold Humanism Honor Society. Residents across all specialties were chosen for demonstrated excellence in clinical care, leadership, compassion, and dedication to service.

Congratulations! You are exemplars of our residency program’s overarching goal: “For you to aim higher.”
Join us in congratulating Rashmi Rode, M.D., Jonnae Atkinson, M.D., and Laura Nietfeld, M.D., who joined volunteer faculty Fahim Farhat, M.D. from Kelsey Seaboard Clinic (top right, with Dr. Huang), Atul Sachdev, M.D., (New Horizon Healthcare), and Laura Armstrong, M.D., (Physicians at Sugar Land), in receiving recognition as Faculty Feedback awards.

Every six months, students complete a survey of their clinical rotations and note the positive examples of professionalism they have witnessed. Although not an official award, the clerkship director recognizes those who have been so honored. Below is a list of all faculty who have received recognition.

**Fall 2019**
- Raja Abusharr, M.D.
- Anjali Aggarwal, M.D.
- Laura Armstrong, M.D.
- Jonnae Atkinson, M.D.
- James Bernick, M.D.
- Ann Gotschall, M.D.
- Elmira Hansen, M.D.
- Rashmi Rode, M.D.
- Alex Su, M.D.

**Spring 2019**
- Anjali Aggarwal, M.D.
- Jonnae Atkinson, M.D.
- Dwane Broussard, M.D.
- Priya Davar, M.D.
- Fahim Farhat, M.D.
- Alisha Kidane, M.D.
- George Shelton, M.D.
- Roslynn Aduhene-Opoku, M.D. (then a PGY-3)
- Nidhisha Anireddy, M.D. (then a PGY-3)

**Fall 2018**
- Anjali Aggarwal, M.D.
- Joe Anzaldua, M.D.
- Jonnae Atkinson, M.D.
- Sanjana Bhattarai, M.D.
- Yongfang Chen, M.D.
- Ann Gotschall, M.D.
- Eric Lee, M.D.
- Xudong Xu, M.D.
As the academic year draws to a close, outgoing chief residents, Drs. Arindam Sarkar and Veena Chavakula, welcome their counterparts for 2020-2021, Rida Khan, M.D. and Mike Ren, M.D.

Patrick McColloster, M.D., collaborated with the Rice University biomedical division to develop a low-cost UV light sterilizer that works with n-95 masks. See their results on ResearchGate.

New FMIG officers were recently elected for the 2020-2021 academic year. Congratulations to:

- President: Kevin Guan (MS3)
- Vice President: Sophie Lin (MS4)
- Treasurer: Ben Chang (MS4)
- Outreach Chair: Mary Robichaux (MS3)
- Lecture Chair: Julio Ruiz (MS3)
- Community Service Chair: Jeremiah Lee (MS4)
- MS4 Rep: Jaeeun Go (MS4)
- MS3 Rep: Savannah Savadel (MS3)
- MS2 Rep: Alan-Michael Sonuyi (MS2)

BCM Momentum Blog

In June, Annette Li, M.D., and Ranjani Amin, M.D., spoke about their Healthy Habits, including exercise and nutrition. Check them out!
Current and Emerging Issues in Global Health is a special collection of the *International Journal of Maternal and Child Health and AIDS*, edited by Hamisu Salihu, M.D., PhD. Unique to this issue is the geographical spread of the article submissions, with articles and contributions from researchers from three continents in a single edition, creating opportunities for crossfertilization of ideas around the global North and South. Public health is passing through a seismic transformation. Whether at the global, national, state, and local levels, disease outbreaks, patient demographics, and health technology have changed the global health landscape. Our hope is that papers in this special collection will spark new ideas for invention and improved patient care to further transform population health.

See the list of articles in this issue on page 17.

This year the department has planned for a virtual Primary Care Update on October 17, 2020. Please save the date! The conference will allow an exciting blend of large group lectures and small group workshops and 7.0 CME credits.

**Clinical Research Methods - Socially Distanced Versions**

Due to the COVID-19 pandemic, the Department of Family and Community Medicine will offer its beginner’s Clinical Research Methods course entirely through Zoom. The course trains health professionals to analyze simple data using statistical analysis software. The next session is August 23-29. Find information and register online [here](#).

The department also offers an online lecture, *Fundamentals of Clinical Research Methods - Study Designs*, an introductory course for anyone interested in acquiring fundamental knowledge about clinical research methods, and skills in calculating basic statistical measures commonly utilized in clinical research. There is no previous experience required, and although all the illustrative examples and exercises bear clinical perspectives, they are easily understood.

*Please note that these video modules are available/accessible online and can be completed at your own pace.*
According to Peter Jian, M.D., stress and spending more time at home can lead to emotional eating and snacking all day from boredom. This may contribute to weight gain over the past few months - a phenomenon many are referring to as ‘COVID-15’ or ‘Quarantine 15.’

If you have gained excess weight or feel out of shape due to quarantine and stay-at-home orders, Dr. Jian offers tips on successfully working it off and returning to a healthy lifestyle.

This spring, Dr. Sarkar received STFM’s Faculty for Tomorrow scholarship of $750 for STFM’s preconference workshop at the STFM Annual Spring Conference. He also received AFMRD’s Advocacy Summit scholarship of $2,500. Additionally, Arindam was inducted into Alpha Omega Alpha Honor Medical Society. He published two narrative essays, “I Didn’t Know Jack” on end-of-life care in the Family Medicine journal and “Piece by Piece” on residency graduation insights in the AAFP blog. Arindam’s passion for teaching and service leadership was highlighted as TAFP’s Member of the Month in which he shares insights from his time as a resident, published by the AAFP.

Jennifer Matas, MPH, was selected by BCM Office of Communications for the June Spotlight. Find out more about her (including what terrifies her) here.

Angie Sung, M.D., has been chosen to represent Texas family physicians in the 2020 edition of Who’s Who in America. Inclusion in the registry endorses her work and significantly enhances her online visibility.
Sarah Bindner, PA-C, and Sumana Basu, M.D., represented Baylor Family Medicine at Baylor’s Wellness Fair in March.

Irvin Sulapas, M.D., cares for athletes during a Houston Sabercats game against the Colorado Raptors. The Sabercats were victorious 21-12.

Dr. Sulapas joins with athletic trainers, medics, and team doctors right before a Houston Sabercats vs. Austin Gilgronis game.

Look at that sunset!

Dr. Sulapas and residents Michelle Wheeler, M.D. (PGY-1); Dr. Sulapas; Rida Khan, M.D. (PGY-2); Alex Herrera, M.D. (PGY-3); Sara Coverdale M.D. (PGY-1), volunteered their medical expertise at the Chevron Houston Marathon.

McColloster TV, McColloster P. *How to Make a UV-C Sterilization Chamber*. Researchgate.net. DOI: 10.13140/RG.2.2.20210.45769

Faustinella F. A Very Persistent Cold. Ann Intern Med. 2020 Jan. 172(2):155-156. This article is still receiving a lot of attention and was even shared on Twitter by Dr. Eric Topol*, reaching ~200,000 people.

6th Decennial International Conference on Healthcare Associated Infections
March 2020

Jasmine Alcala joins Healthcare for the Homeless-Houston (HHH) as a community health worker.

Darlene Basier is a front desk specialist with Baylor Family Medicine at our River Oaks location.

Katy Caballero, MBA-HC, is the Senior Practice Manager for the River Oaks Baylor Family Medicine clinic. She received her undergraduate degree at SUNY College at Old Westbury and attended St. Joseph’s College in Patchogue, NY.

Kalpana Chennareddy, M.D., received her medical degree from Guntur Medical College in Guntar, Andhra Pradesh India (2004), and completed residency training at the UPMC McKeesport in Pittsburgh (2012). She sees patients at the Martin Luther King, Jr. Health Center.

Geralynn Crawford is a Medical Assistant I at HHH.

Maria Cuellar, MAII, received her education at San Jacinto College in 2017. Before joining the department, she worked at Next Level Urgent Care as a Worker’s Compensation Coordinator and Medical Assistant. Ms. Cuellar is a BCM temp working at the Kirby Clinic.

Paolo Dugo, PA-C, received his undergraduate education at Penn State (B.S., Vertebrate Physiology) in 2017. He then graduated from BCM (M.S., Physician Assistant Studies) in 2019. Paolo sees patients at MLK Health Center.

Anees Fatima, M.D., received her medical degree at Deccan College of Medical Sciences at NTR University of Health Sciences in Andhra Pradesh, India. She completed residency at Jackson Park Hospital in Chicago, IL, (2004). Dr. Fatima sees patients at Casa de Amigos Health Center.

Namrata Walia, M.D., MHA, received her medical degree from Yerevan State Medical University in Yerevan, Armenia (2007), and the Master of Healthcare Administration from the University of Texas Rio Grande Valley (2018). She joins our research team as a Primary Care Research Fellow.

Carol Manning, DNP, APRN, FNP, BC, received her doctorate from Texas Woman’s University in May 2019. She sees patients at the MLK Health Center.
**Carrie Grady** is a medical assistant at the Kirby Clinic.

**Luis Huerta** attended the Texas School of Business and DISA Drug Testing & Occupational Medical Services - Deer Park (2011). He works at HHH.

**Marcia Lynn Jackson** is a Behavioral Health Specialist with our research team.

**Laneilya Jones** is a Medical Assistant I with HHH.

**Jauvzzelyn Lee, RNCMA**, received her education at Fortis College Medical Assistant Program in 2018, with certification in the Elite Art of Phlebotomy (2019). Before joining the department, she worked in the Teen Clinic. A BCM temp, she works at the Kirby Clinic.

**Padmini Meda, PA-C**, received her medical education at Le Moyne College in Syracuse, NY, (M.S., Physician Assistant Studies) in 2019. She sees patients at HHH.

**Victoria Nnadi, M.D.**, received her medical degree from the University of Maryland in Baltimore (1996) and completed residency training at York Hospital in York, PA (1999). Most recently, she worked at Norton Healthcare Medical Associates in Louisville, KY. Dr. Nnadi sees patients at Strawberry Health Center.

**Monica Prado, M.D.**, received her medical degree from Universidad Autónoma de Nuevo León in Monterrey, México, in 2006 and completed residency training at UTMB in Galveston (2014). She continued her training with a Geriatric Medicine Fellowship at BCM in 2015. She sees patients at Casa de Amigos Health Center.

**Hina Qureshi** is a medical assistant at our TMC location.

**Marshall Sykes** is a Limited Medical Radiologic Technologist. He received his education from The College of Health Care Professions in 2019, and has previously worked at Care Now - River Oaks and at Entrust Urgent Care - Signature Care. He works at the Kirby Clinic.

**Mini Vettical, M.D.**, is a floater with our HHS service.

**Sharonda Wilkes** joins the Baylor Family Medicine team as a radiology technologist, working at the River Oaks location.
A fond adieu...

The 2019-2020 Family Medicine Residency Graduates are (front row)

Mohammad Khoaja, M.D., joins the department at Gulfgate Health Center.

Arindam Sarkar, M.D., also joins the department at Northwest Health Center.

Alexander Herrera, M.D., continues his education at the Kaiser Permanente Sports Medicine Fellowship in Fontana, California.

...and a warm welcome

It is our privilege to introduce the class of 2023 to our family of family medicine. Our residents are our greatest asset and strength, and we honored that these eight individuals chose our program.

Tanvir Ahmed, M.D.
UT-McGovern Medical School

Christina Babu, M.D.
Texas A&M College of Medicine-Roundrock

Chinwe Ezenna, D.O.
Philadelphia School of Osteopathic Medicine

Chelsea Mendonca, M.D.
UT Health San Antonio

Nadir Mulla, M.D.
UTMB School of Medicine

Tam Nguyen, M.D.
Liberty School of Medicine

Chad Scott, M.D.
UT Health San Antonio

Youxin Xiong, M.D.
UT-McGovern Medical School

MATCH DAY 2020 BY THE NUMBERS

184 fourth-year medical students
105 primary care residents
33 matched with Baylor
71 matched in Texas programs
