

**WEEKLY GI RESEARCH WEBINAR**

**"Risk Stratification  
of Colonic Neoplasia  
from Field  
Carcinogenesis Detection"**

**Hemant Roy, M.D.**

Brown Professor and Vice-Chair  
Department of Medicine  
Baylor College of Medicine

The research overarching theme is to personalize colon cancer screening by risk stratification through field carcinogenesis detection. The detection approach is multifaceted including biophotonic, microRNA and other high order chromatin remodelors. There is a focus on using this platform to understand racial disparities in colon cancer.
