

Fit Test Scheduling and Training

Fit testing is done by the Office of Environmental Safety (OES). Fit testing is done annually. At the conclusion of a successful fit test, you will receive a laminated card listing your approved N95 respirator(s) manufacturer, model and size for your reference.

Medical Clearance

Medical clearance is required from the BCM Occupational Health Program (OHP) prior to N95 or other respirator fit testing. This only needs to be completed once, not annually.

You may have already completed your medical clearance and, if so, it does not need repeating. To see if you have, you can log in to check. Logging in requires your BCM credentials and may also require VPN connection. If you have trouble logging into either system, please contact the IT Help Desk at 713-798-8737.

If you've been with BCM since April 2025, log in to <https://www.bcm.edu/MyOHP>. The Respirator Medical Evaluation is available in the Required Immunizations and Forms section from the home screen. It will show "Compliant" if it has been completed and reviewed.

Respirator Medical Evaluation

 Compliant

If you've been with BCM prior to April 2025, log into our Legacy system (OHPIS) instead. <https://intranet.bcm.edu/as/ohpis/index.cfm>. You'll be able to see a complete service history of your records. If you see an entry labeled "Questionnaire-Resp.-TB" then medical clearance is complete.
