

GENE VECTOR CORE LABORATORY

Room R630, The Margaret M. Alkek Building for Biomedical Research

Request service through [iLabs](#)
Email To: genevector@bcm.edu

Effective April 1, 2020

Service	Scale	Baylor Cost
HDAd Transfection, Amplification, Purification	1-liter suspension	\$2,980.00
HDAd Amplification, Purification	1-liter suspension	\$1,700.00
AAV Transfection, Purification, Titration of Vector Genome	10 x 15-cm dish (half-scale)	\$920.00
	2 x 10 x 15-cm dish (2 x half-scale)	\$1,535.00
	20 x 15-cm dish (full-scale)	\$1,438.00
	40 x 15-cm dish (CsCl purification)	\$2,295.00
LV Transfection, Purification, titration	2 x 15-cm dish (full-scale)	\$736.00
	Additional 2x15-cm dish	\$368.00
G-deleted Rabies, rescue, amplification, concentration	4 x 15-cm dish	\$1,275
Plasmid rescue and Maxi Prep	1	\$300.00
Plasmid rescue and midi prep	1 prep	\$210.00
	2 prep	\$350.00
Simple cloning into transfer vector (no midi prep)	1	\$270.00
Plasmid deposited to Addgene	5 µg	\$50.00
HDAd in catalog (titer>1E+12 vp/ml)	100 µl	\$340.00
AAV in catalog (titer>1E+13 gc/ml, except AAV2 and AAV6)	20 µl	\$220.00
LV in catalog (titer of most LVs >5E+8 TU/ml)	50 µl	\$130.00
Other (custom, partial service, different scale, expedited service, etc.)		Inquire

AAV: adeno-associated viral vector; **LV:** lentiviral vector; **HDAd:** helper-dependent adenoviral vector
